To: Luisa Pereira cdpm@gn.apc.org

Dear Luisa,

Just to let you know that I have received a letter from my mother to say that she has received a couple of packages from Europe (no doubt from you) and that she will bring them with her to Ambon later this month. I will then pass them on to their destination as soon as I return. I have told our mutual "amigo" that he can expect your gifts very soon. Luisa, he is such a delightfully sensitive and gentle person - his letters (I receive usually two per week) are such a source of joy and inspiration to me! Please feel free to send messages to him via this route - I will print them out and send them in to him immediately. I'm sure that it will not be a problem that they are not hand-written or signed - he knows that I am "uma pessoa de confianca" and therefore will not doubt their authenticity.

In his last message to me, Joao reported the following with regards to the radio frequency information you provided me/them with: "At 8:00 pm, we still can't find Radio international Port. We have been following the Portuguese news in banda 13m and frequency 21515, but many times it does not come clear, many interference. But some other time comes clear. In the banda and frequency given by LTP does not come out Portuguese language, but something like Arabic. Maybe the banda given is used in another time and not at 8 pm, but maybe in the afternoon. We will try to find out. Please send our agradecimentos to LTP if you have the opportunity to contact her".

Luisa, with regard to the PGP encryption software, I have a friend called Colin Renwick who can be contacted via the following address: colren@gn.apc.org - he has the software and also my "key" which you would need in order to be able to communicate with me directly (instead of via Robg at Pactok, Sydney). I have asked him to be in contact with you to. In the meantime, it is fine for you to continue to contact me via Robg@pactok.peg.apc.org (he will encrypt your messages before passing them on).

For now, um forte abraco da sua amiga em Jacarta,

Kirsty S.
